

Statecraft Simulation Group

Economic Competition Game

(Alpha Test)

Nov 7, 2025

Preparation

Hypothesis

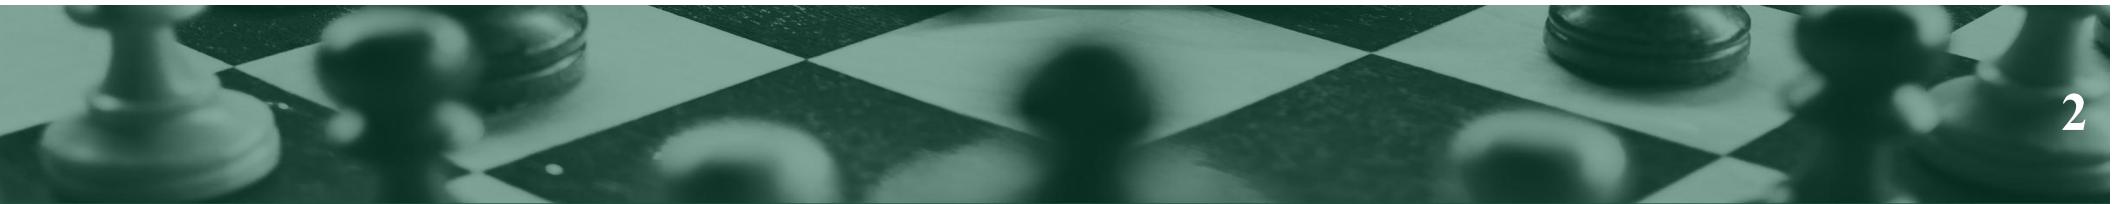

If the U.S. government maintains the current approach to the US-PRC strategic competition,
then the U.S. will lose the competition.

Problem Statement

The U.S. has allowed “soft” power tools to weaken since the end of the Cold War. The U.S. is engaged in a long-term strategic competition with the People’s Republic of China. The PRC aims to replace the U.S. as the leading global power. If successful, **the PRC will reshape the global world order in a way that is unacceptable.**

Purpose

The purpose of the simulation is to explore and evaluate alternative approaches to U.S. statecraft in managing sustained strategic competition with the PRC.

Objectives

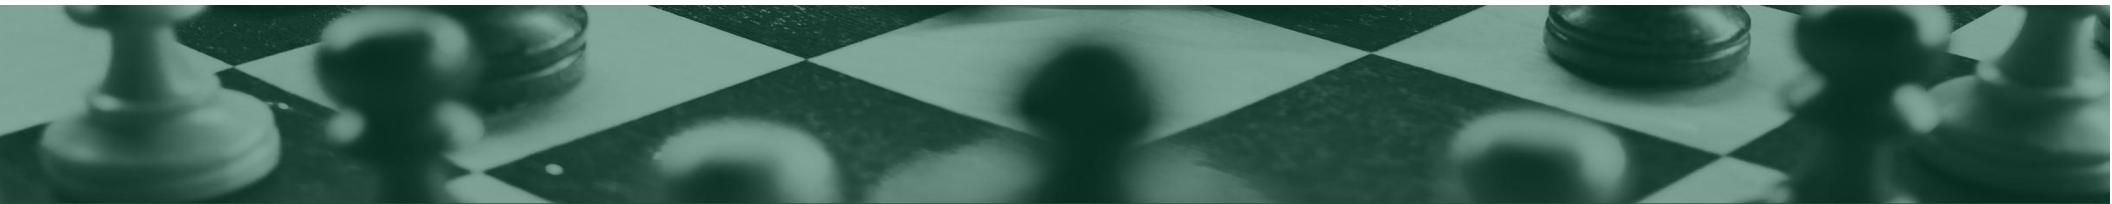

Primary Objective

- **Evaluate the effectiveness of nonmilitary instruments of statecraft, including but not limited to sanctions, investment restrictions, economic incentives, information campaigns, and diplomatic initiatives, in shaping state behavior and international outcomes.**

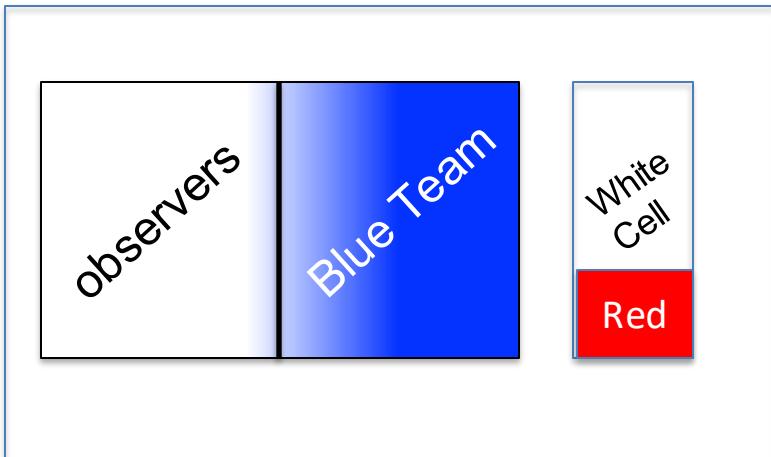

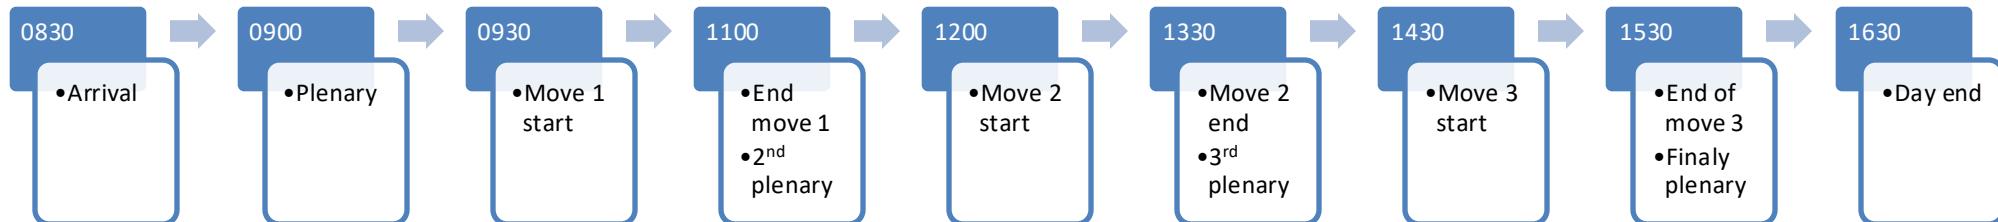

Secondary Objectives

- **Assess U.S. and partner vulnerabilities and interdependencies within the current architecture of international competition, emphasizing economic exposure and industrial capacity alongside political alignment and informational contestation.**
- **Test mechanisms of U.S. whole-of-nation and allied coordination, focusing on how the United States, European allies, Indo-Pacific partners, and the industrial base can act in concert to strengthen collective resilience and strategic coherence.**
- **Identify key inflection points where national and allied actions may reinforce or undermine the stability of the existing US global alliances structure.**
- **Produce actionable insights and policy recommendations to inform U.S. and partner strategies for sustaining long-term advantage within a competitive global environment.**

Priority Industries in China's 15th Five-Year Plan

Beijing wants to raise traditional industries' "competitiveness in the global division of labor," expand emerging industries, promote future industries as new growth drivers, and "adopt extraordinary measures" to achieve "decisive breakthroughs" in key core technologies. AI gets its own section, as it will "empower all industries in an all round way."

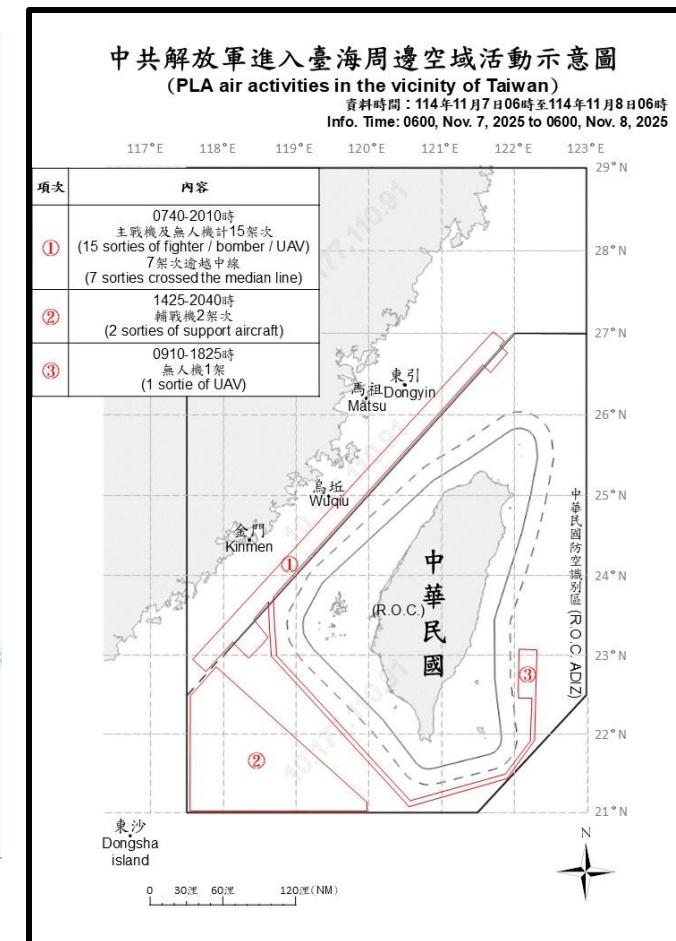

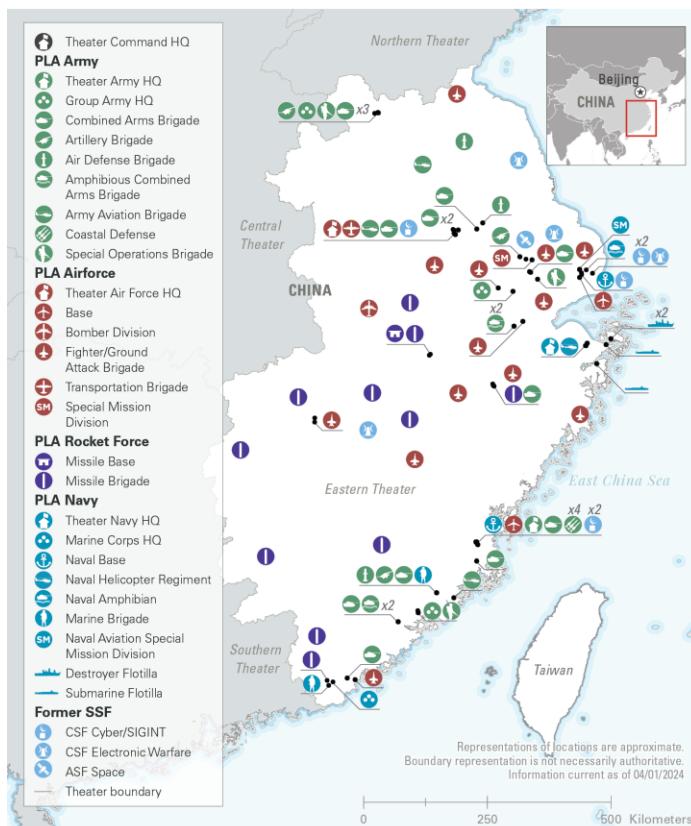

Traditional Industries	Emerging Industries	Future Industries	Key Core Technologies for Decisive Breakthroughs
Mining	New Energy	Quantum Technology	Integrated Circuits
Metallurgy	New Materials	Biomanufacturing	Industrial Machine Tools
Chemicals	Aerospace	Hydrogen Energy	High-End Instruments
Light Industry	Low-Altitude Economy	Nuclear Fusion Energy	Foundational Software
Textiles		Brain-Computer Interfaces	Advanced Materials
Machinery		Embodied Intelligence	Biomanufacturing
Shipping		6G Mobile Communications	
Construction			

As suggested in the "Proposals" issued by the Communist Party's Fourth Plenum in October 2025.

Table: ASPI Center for China Analysis • Created with Datawrapper

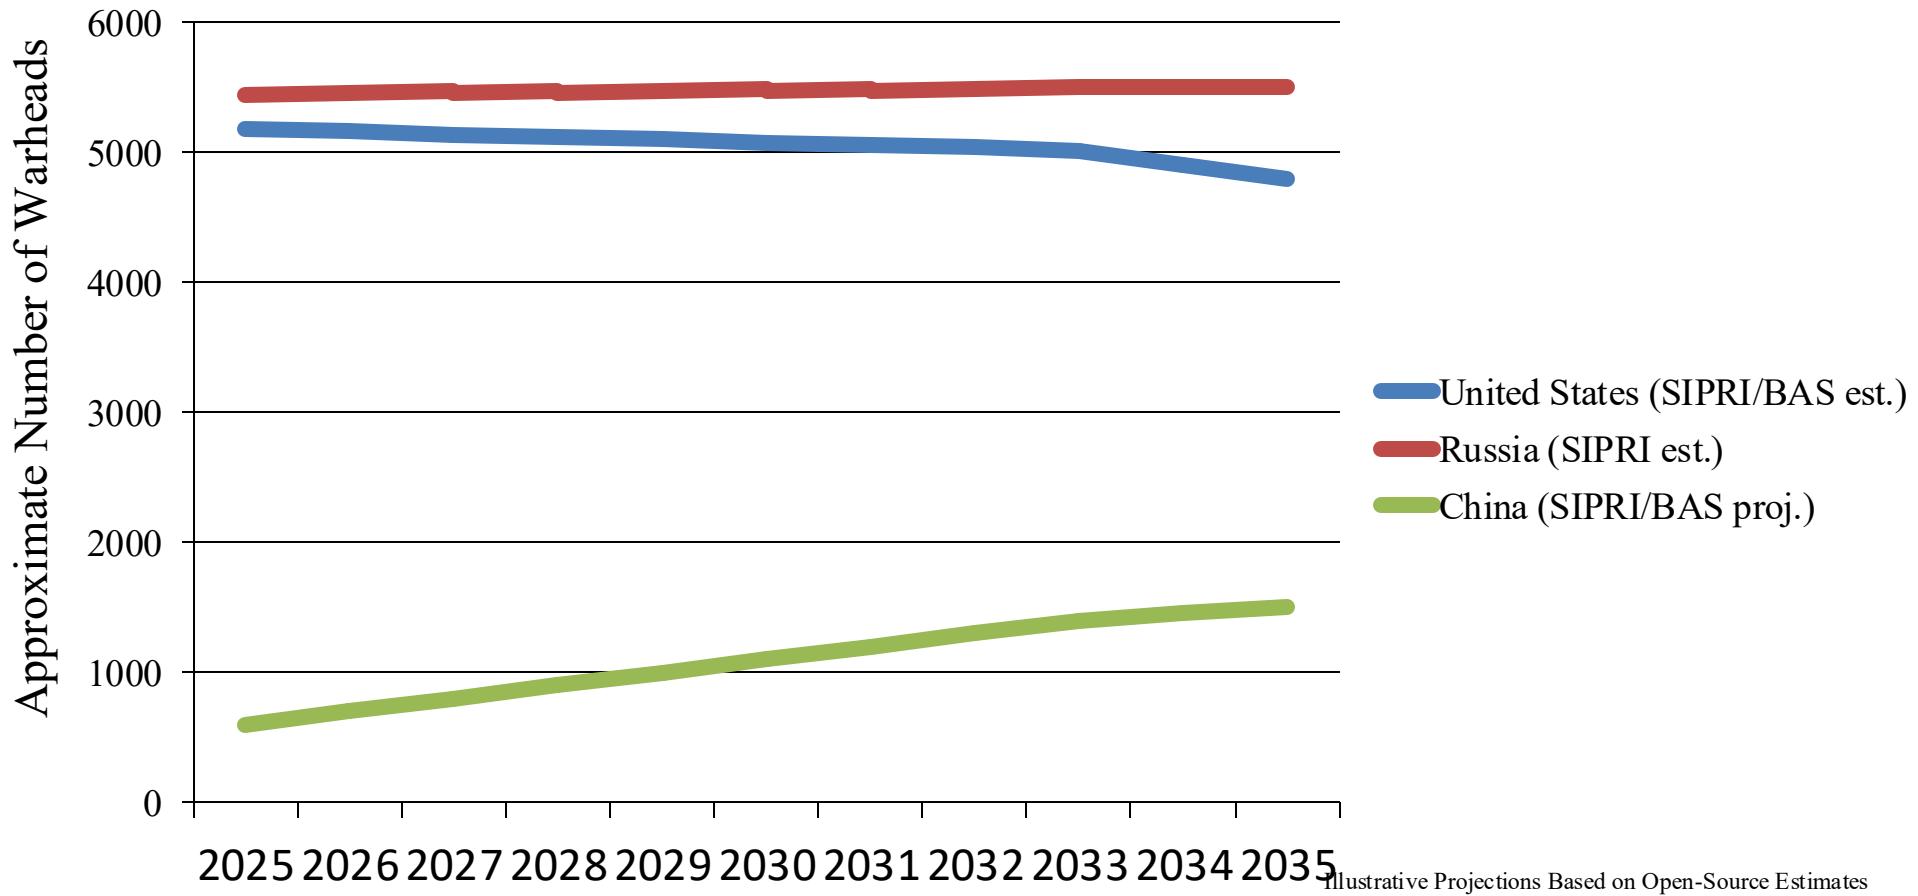

Eastern & Southern Military Commands

Projected Nuclear Stockpiles (2025–2035): U.S., Russia, and China

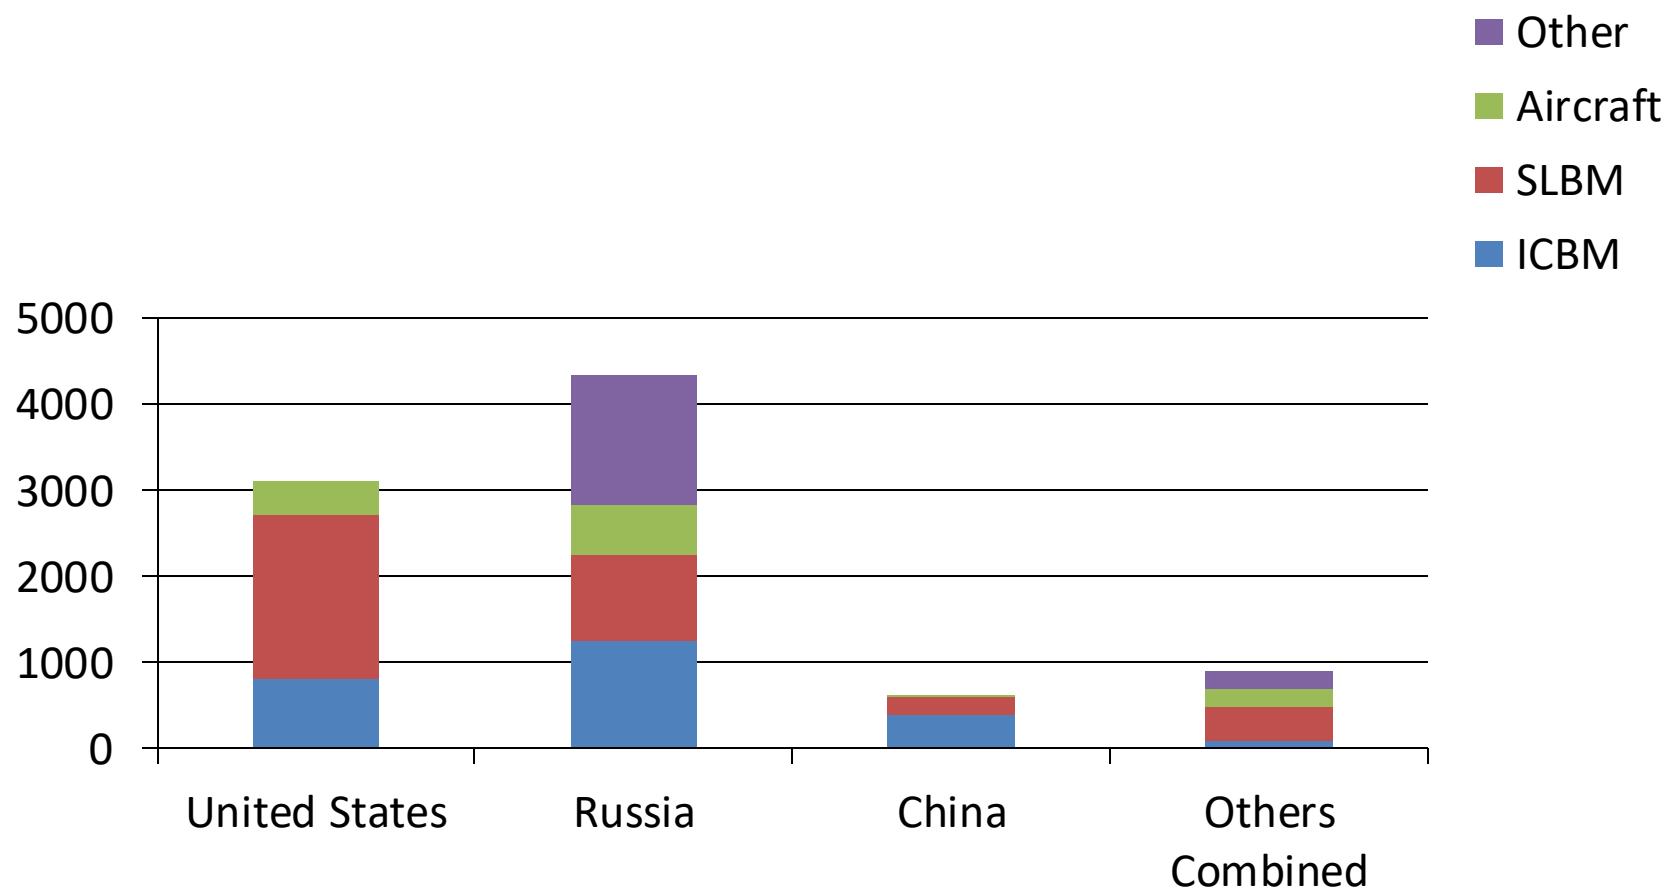

Projection values based on SIPRI Yearbook 2025 and Bulletin of the Atomic Scientists (March 2025); illustrative classroom estimates only.

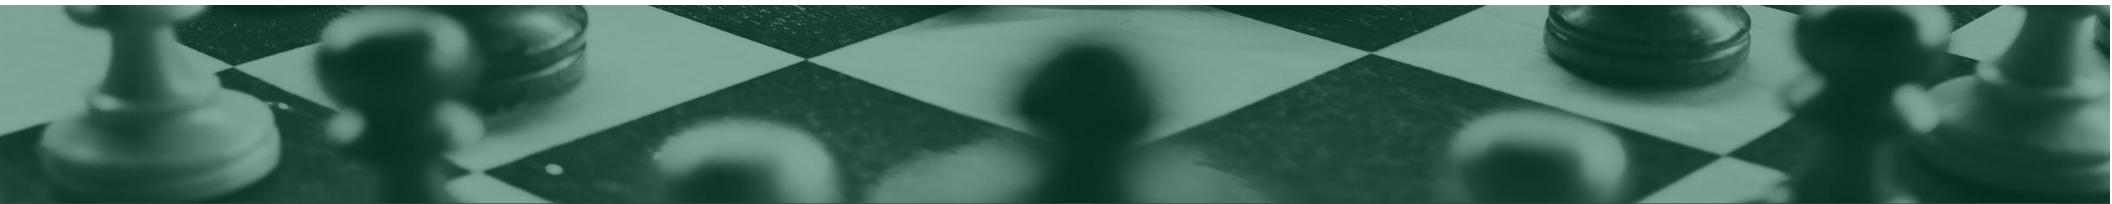

Sources: **SIPRI** (Stockholm International Peace Research Institute), The Bulletin of the Atomic Scientists, and open-source analyses of China's nuclear modernization (2024–2025).

Estimated Nuclear Warheads: US/Russia/PRC vs R.O.W. (2025)

Note: 'Others Combined' includes France, United Kingdom, India, Pakistan, Israel, and North Korea.

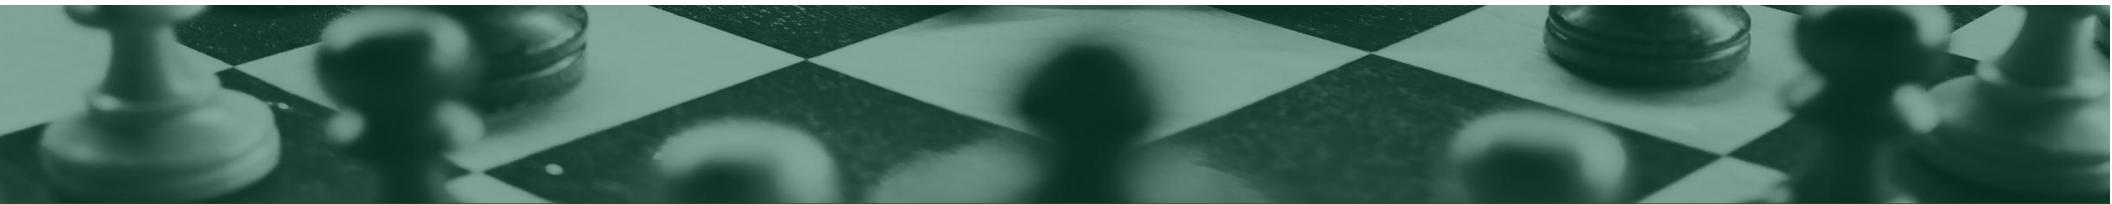

Numerical Data Table: Nuclear Warheads by Category (2025)

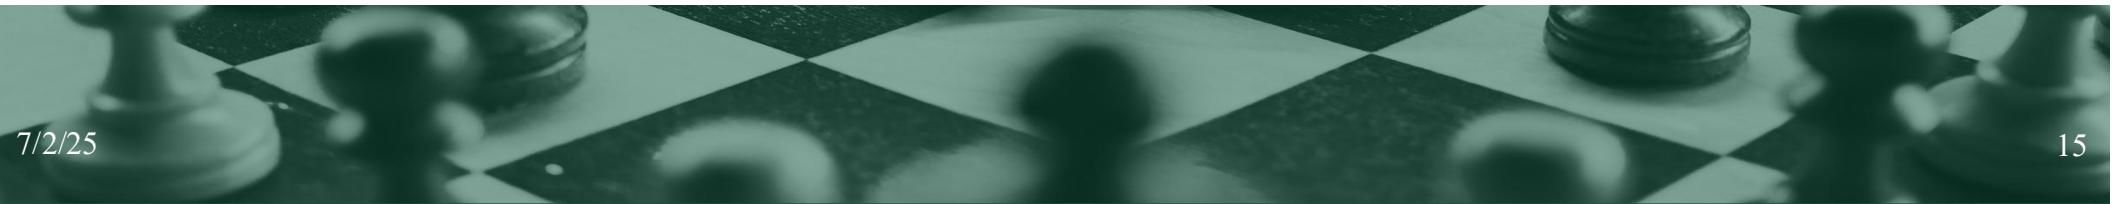

Country/Group	ICBM	SLBM	Aircraft	Other
United States	800	1920	400	0
Russia	1254	992	586	1500
China	400	200	20	0
Others Combined	90	385	210	215

 - **Competitor Responses**
 - **Partner Responses**
- **Surprises**
- **Future Adjustments**

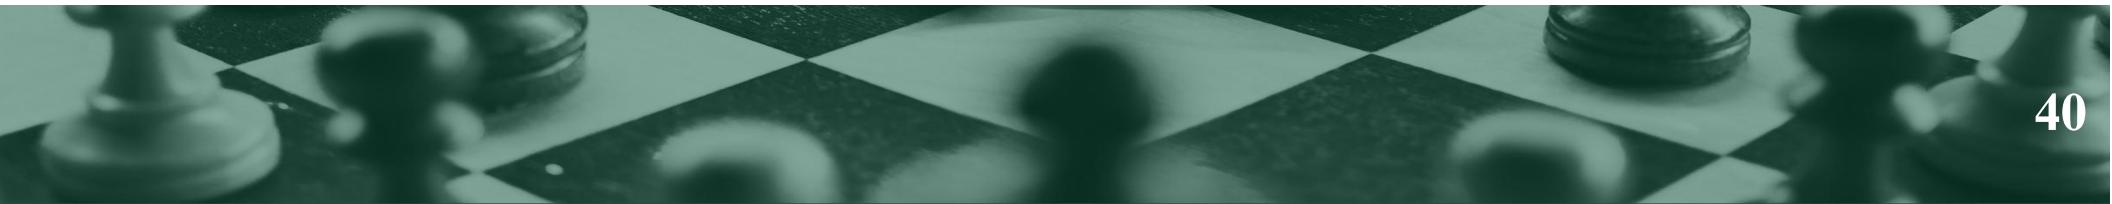

Observations (2 of 2)

- Competitor Strategy
- Competitor COAs
 - Your Responses
 - Surprises
- Future Adjustments

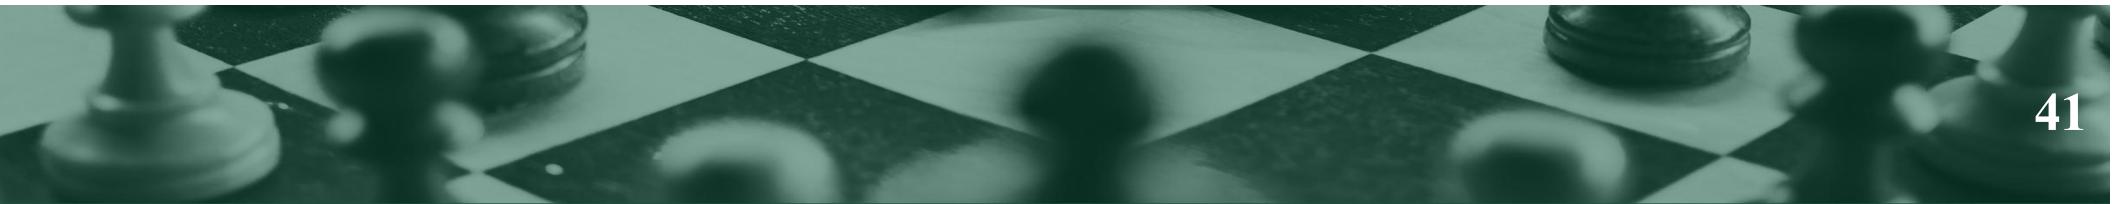

Reflection & Takeaways

- **What is the most important decision your team made today?**
- **What observations or insights did you take away from the game about the continuing strategic competition between the U.S. and Russia?**
- **What is the most important thing you learned about the Arctic region today?**
- **How will you incorporate lessons learned into your research paper?**

Questions?
